

MARIST COLLEGE

SCHOOL OF COMPUTER SCIENCE AND MATHEMATICS

Department of Computer Science and Information Systems

POSITIONS IN INFORMATION SYSTEMS, COMPUTER SCIENCE & INFORMATION TECHNOLOGY

The Department of Computer Science & Information Systems at Marist College is expanding and currently seeking qualified applicants for several positions in Information Systems and Information Technology, starting in the spring or fall of 2003.

The Department of Computer Science & Information Systems is experiencing rapid growth, especially within our new Information Technology program. To support this growth, the college has invested substantially in three new teaching laboratories dedicated to our program and authorized additional full-time faculty positions.

The Marist College information technology infrastructure was developed through a joint project with the IBM Corporation, of which the second phase is now in progress. Research is being conducted in the areas of data quality, streaming media, virtual Linux servers, grid computing, and System 390 applications. Marist has also established a major Linux Research and Development Center and is in the process of establishing a special training program in an S390 environment. In addition, Marist is leading major efforts to educate professionals in e-commerce with on-line courses in Linux, Java technologies, Web technologies, distributed systems, and others.

For the position in Computer Science, we are particularly interested in candidates with expertise in Software Development, Database and Computer Graphics. In addition, we would welcome applications from individuals with expertise in other areas as well. Courses are taught at both the graduate and undergraduate levels. An earned doctorate is required for this tenure-track appointment.

For the position in Information Systems, we are particularly interested in candidates with expertise in Decision Support Systems. In addition, we would welcome applications from individuals with expertise in Data Management, Systems Analysis, and Systems Design. All of these courses are taught at both the graduate and undergraduate levels. An earned doctorate is required for this tenure-track appointment.

Candidates seeking a position in Information Technology need to be knowledgeable in the area of Web technologies, such as Web Services, XML, CGI/Perl, multimedia, and in Java™ and/or Microsoft®.NET server-centric software development. An earned doctorate is required for a tenure-track appointment; however, candidates with a master's degree will be considered for a term appointment.

Marist College is strongly committed to the principle of diversity. We are especially interested in receiving applications from members of ethnic minorities, women, disabled individuals and other under-represented groups. Review of applications will begin immediately and continue until the positions are filled. A letter of application specifying position along with a curriculum vita and the names of three recent professional references should be addressed to: Roger Norton, Dean, School of Computer Science and Math, MPO-905/MIS, Marist College, 3399 North Road, Poughkeepsie, NY 12601-1387
