HEAD, DEPARTMENT OF INFORMATION SYSTEMS

National University of Singapore (NUS) is Singapore's flagship university which offers a global approach to education and research with a focus on Asian perspectives and expertise. Its 16 faculties and schools provide a broad-based curriculum underscored by multi-disciplinary courses and cross-faculty enrichment. Its transformative education includes programmes such as student exchange, entrepreneurial internships at 7 NUS Overseas Colleges, as well as double degree, concurrent degree, and joint degree programmes with some of the world's top universities. The learning experience is complemented by a vibrant residential life with avenues for artistic, cultural, and sporting pursuits. Over 37,000 students (27,000 undergraduate students and 10,000 graduate students) and over 2,000 faculty members from 100 countries enrich the community with their diverse social and cultural perspectives. For more information, please see www.nus.edu.sg

Established in 1998, NUS School of Computing is home to more than 100 faculty members who have received their education from leading universities worldwide. It has a student population of more than 2,000 (a quarter of these students are graduate students). School of Computing has two Departments: Computer Science and Information Systems. The QS World University Ranking for Computer Science and Information Systems in 2013 places School of Computing among the top 10 globally (please see http://www.topuniversities.com/university-rankings/university-subject-rankings/2013/computer-science-and-information-systems)

Established in conjunction with NUS School of Computing, Department of Information Systems is internationally renowned for being the home to faculty members who are serving on editorial boards of major journals and program committees of major conferences in the field. Besides its doctoral and masters programs, the Department also offers undergraduate programs with majors in information systems, electronic commerce, and business analytics (in cooperation with other faculties and schools). Its strong link with the industry can be seen from its leadership roles in the Strategic Technology Management Institute and the Centre for Health Informatics.

NUS seeks to appoint an internationally-recognized scholar as Head of Department of Information Systems. The Head will lead the Department in all academic and administrative matters, including providing thought leadership and innovative ideas for research and teaching programs. The salary and benefits are internationally competitive. The preferred start date for this appointment is July 1, 2014.

Please send applications (with curriculum vitae) or enquiries by 10 December 2013 to:

Bernard C.Y. Tan
Runme Shaw Professor of Information Systems
Chair, Head Search Committee
